Education

Date	2007
Certificate obtained	High School Degree
Institute name and type	Scientific High School "Innocenzo XII", Anzio (RM), Italy

Professional experience

Date	December 2015 - September 2018
Position	Senior Web App Developer, freelance
Location	Remote
Job description	Full-stack web/mobile development - Wordpress dev and content management

Developer and maintainer of "Acquirly", a review generation tool I built from scratch for 33 Mile Radius. Acquirly is an hybrid app built on top of Meteor, a full-stack platform Javascript platform I felt in love since 2015.

Development of this app took roughly 6 months - been developing new features and maintaining the code for another 2 years or less.

The app can be currently reached out at <https://acquirly.33mileradius.com/>, or downloaded for free from Google Play and Apple Store (account required).

Parallel to this I've done mostly frontend work for the company, like enhancing websites and building internal tools and plugins.

Main responsibilities

- Full-Stack web/mobile development and maintenance
- Wordpress development and content management
- API dev (company internal tools, experimental features, etc)
- Documentation

Technologies used

- Meteor.js
- MongoDB
- Docker
- Apache Cordova
- NGINX webserver
- PHP, Wordpress
- Javascript / jQuery / AJAX
- CSS3 / HTML5
- Trello / Slack
- Git, Bitbucket
- Shell scripting

Team size: 1-3, depending on task assigned

Company name and address

33 Mile Radius
 6133 Rockside Rd #400, Independence, OH 44131, USA

Professional experience

Date	September 2014 - February 2015
Position	Backend developer, freelance
Location	Pomezia (RM), Italy / Remote

Job description

"Hermes", Import Export Enterprise Portal

Main developer of an import-export enterprise managerial portal. The software was mainly built in Node.js and Ext.js, respectively for the back-end and front-end. RabbitMQ, RESTful API, modularity, redundancy and security was the keywords.

This enterprise application was conceived as modular and connected with a front-end web interface built in Ext.js.

Each Hermes module communicated with each other through an AMPQ queue messaging system and through HTTP/FTP requests. I also developed a strong authentication management server in a different, remote and dedicated machine.

I've been also in charge of writing the documentation on the document management platform (FTP/SFTP, Alfresco Community), doing some database management (Oracle), writing the notifying systems (email, SAP, direct sockets) and logging.

Unit Testing through Apache jMeter.

Main responsibilities

- Back-end development
- Testing and debugging
- Database management

Technologies used

- Node.js
- Alfresco Community 3.4
- Apache Tomcat 8.0.11
- Apache JMeter
- RabbitMQ AMQP Server 3.3.5
- Oracle 11g
- Redmine issue tracking
- SVN
- ProFTPD
- Ubuntu 14.04 LTS

Team size: 2-4

Company name and address

Technology Trading Consulting srl,
Via Cavour 108, 00184 Roma, Italy
